

PROFESSIONAL SUMMARY

Full-Stack Developer with project-based experience in the MERN stack (MongoDB, Express.js, React.js, Node.js), RESTful API design, JWT-based authentication, and responsive web development. Built 5+ full-stack applications focusing on scalability, clean architecture, and performance optimization. Strong foundation in Data Structures and Algorithms, Object-Oriented Programming, Agile/Scrum, Git, and deployment workflows. Hands-on experience with Generative AI, including LLM-powered applications and agentic AI workflows. Actively seeking Software Engineer / Full-Stack Developer roles.

EDUCATION

BACHELOR IN TECHNOLOGY

GURU TEGH BAHADUR INSTITUTE OF TECHNOLOGY
GGSIUP Dwarka, New Delhi

2021-2025

INFORMATION TECHNOLOGY
OVERALL CGPA-9.27/10

SENIOR SCHOOL (12th)

S.R. CENTURY PUBLIC SCHOOL
Bahadurgarh, Haryana

Passed: 2021

PCM (CS): 93.2% (CBSE)

SENIOR SCHOOL (10th)

S.R. CENTURY PUBLIC SCHOOL
Bahadurgarh, Haryana

Passed: 2019

94% (CBSE)

COURSEWORK

- Data Structures and Algorithms
- Frontend Development
- Backend Development
- ReactJs
- Generative AI

INTERNSHIP EXPERIENCE

MERN Stack Web Development Internship

EY Global Delivery Services & AICTE

Feb 2025 – Mar 2025

- Completed 6-week internship focused on building modern web applications using MongoDB, Express.js, React.js, and Node.js.
- Gained hands-on experience in full-stack development, authentication, and deployment best practices.

TECHNICAL SKILLS

PROGRAMMING LANGUAGES

- C++, JavaScript (ES6+), TypeScript, Python
- Data Structures & Algorithms (DSA)

FRONTEND DEVELOPMENT

- HTML5, CSS3
- React.js, Next.js
- Tailwind CSS, Bootstrap
- AI-integrated UI

BACKEND DEVELOPMENT

- Node.js, Express.js
- REST APIs , API Design & Integration
- Python (FastAPI)
- MongoDB (Mongoose), Prisma ORM
- Authentication & Authorization (JWT, Clerk)
- Scalable Architecture & Microservices

AI & AGENT SYSTEMS

- Generative AI, LLM Applications (OpenAI, Gemini)
- Agentic AI (ReAct, Tool Calling, Multi-Agent Systems)
- Retrieval-Augmented Generation (RAG)
- LangChain, LangGraph, LlamaIndex, LangSmith, SmolAgents
- Embeddings & Semantic Search
- Vector Databases: Qdrant
- Prompt Engineering & LLM Evaluation
- Fine-tuning Basics (LoRA, Function Calling)

TOOLS & PLATFORMS

- Git, GitHub, Postman
- Docker, Docker Compose
- Render, Vercel , Netlify, Qdrant Cloud
- VS Code Cursor & Antigravity (AI Pair Programming)
- CI/CD Basics & Deployment Workflows

TECHNICAL PROJECTS

RAG NEXUS

March 2026 - April 2026

- Engineered a scalable AI-powered **Retrieval-Augmented Generation** (RAG) system using **Python** and **FastAPI** to enable low-latency, context-aware question answering over large PDF datasets
- Designed end-to-end data pipeline for document ingestion, **semantic chunking**, and **embedding** generation using **LangChain** and OpenAI APIs, significantly improving retrieval relevance and accuracy.
- Optimized **vector search** using **Qdrant** for high-performance similarity matching and deployed the system via **Docker Compose** for reproducible, production-ready environments.

InterAi – Your Intelligent AI Interview Coach

Sep 2025 - Oct 2025

- Built a full-stack AI-powered interview platform using React.js (Vite), Node.js, Express.js, and MongoDB Atlas with a responsive, mobile-first UI.
- Implemented **LLM-driven** adaptive interview workflows using **LangChain** and **Google Gemini AI** for dynamic question generation and real-time evaluation.
- Developed scalable RESTful APIs to manage user authentication, interview sessions, and AI feedback pipelines.
- Integrated **Clerk authentication** for secure user onboarding, session management, and role-based authorization in a cloud-ready architecture.
